

Rock Painting Bugs

What bugs will you paint?

Here's what you'll need!

Rocks

Acrylic paint

Paint brushes

Gloss varnish (optional – to make them shiny!)

Googly eyes (optional)

Instructions:

1. Wash your rocks with water and let them dry. Think about what bugs/insects you would like to paint e.g. ladybird, bee, snail etc.
2. When the rocks are dry, start painting your bugs.
3. Let the paint dry and then paint a layer of gloss varnish on top before sticking on the googly eyes.
4. You can now place your bugs in the garden or on a windowsill!

Visit your **local garden centre** to get started.
